Exhibition Display

Portable Pop Up display stand are lightweight, easily transportable display systems. One person can assemble a pop up stand in minutes.

This strong, lightweight, one-piece aluminium frame pops up in seconds to form a sturdy support to hang graphic panels around the stand. The graphic panels hang on magnetic strips and can create a high visual impact. Once the presentation is over the pop up stand can be easily dismantled, stored in the transport case and then easily placed into the boot of a car. They are cost effective way to visually communicate your products, brands or message, which makes them ideal for exhibitions, conferences, presentations or static information displays.

One man operation fast to set-up and easy to use / Portable / Graphic Panels hang on magnetic strips

PVC Frame Capping
The fastest and most economical way to have a framing for your foamboard poster, PVC Frame Capping also serves to protect your foamboard posters from being damaged through knocks unintentional and dings in this unpredictable world.
The perimeter-based framing using a U-shaped PVC profile is light and does not add much weight to the poster. It provides a nice touch to foamboard posters that go up on the wall.
• Sizes : A4 / A3 / A2 / A1 / A2 / AO
• Available Colours : Matte (Black or White) / Glossy (Silver or Gold)

Customized Quality Artist Canvas / Art Gallery Quality Canvas

Getting your photographs printed on canvas means your precious pictures will last forever – long-lasting artworks that perfectly capture your special memories. At De Novo Design, we provide different customization print size you need for all your office, event, exhibition, showroom, retailstore, hotel lobby, cafe, restaurant, homes spaces etc.

What is a Canvas Print?

Canvas Printing, or Giclee Printing (pronounced Zhee-Clay) is a process in which a picture of photograph is printed on a piece of high-quality canvas at affordable price and then stretched around a hardwood frame. Canvas Prints that feature in art galleries & famous museum across the world.

Why should you get a Canvas Print?

Some pictures and photographs are special. They deserve to be highlighted and made to last forever. These moments in life make ideal candidates for canvas prints.

Imagine your wedding picture artistically rendered into a 42x63 inch portrait. Each sparkle in your eye captured in picture that will remain fresh for more than 75 years. Your child’s first smile. Your prize-winning photograph. Your favourite holiday snap. Your family portrait. Each of them can be brought to life for you to enjoy for a lifetime. For this very reason, Canvas Prints also make unparalleled gifts for the people in your life.

Our canvas prints are created using hand-cut top grade timber frames

Framing is one of the most important components of a canvas print. Poor quality framing results in loose, floppy prints that do not sit flush against the wall. This is one area where you will notice the difference. We have our framing timber custom made to our exact specification. We simply could not find suitable quality framing timber off the shelf. Many competitors use cheaper pine for their frames. We have chosen to invest a little more and use first grade, kiln dried meranti. This timber is resistant to rot, uniform in texture, and has been used in fine joinery for decades.
